**Title**: Foodies

**Rationale**: It is a application that makes use of an API to offer customers the most practical and effective method for discovering the best cooking recipes available. People frequently struggle to locate suitable recipes in the fast-paced world of today that match their culinary prowess, dietary preferences, and availability of ingredients and timing constraints. They may quickly look for the greatest recipe to attempt with the aid of this app.
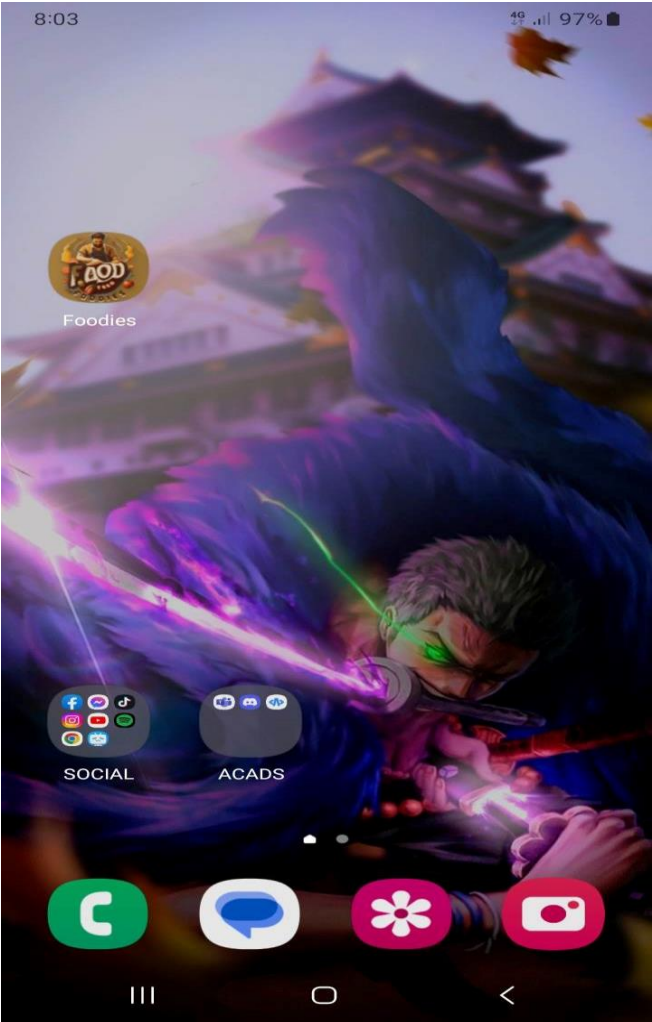

**Features:**

1. The user can use it freely anytime anywhere
2. The user can search recipes or ingredients that they want to cook.
3. The user can go to there website and learn more about the process of making that recipe.
4. The user can save the recipe in the favorite screen.

**Target Users:** Anyone who wants to cook and or learn about the recipes.

**Importance and Novelty of Application:**

The "Foodies" application stands out by addressing the common challenges faced by individuals in today's fast-paced world when it comes to finding suitable recipes. By leveraging an API and offering features like search functionality, website integration, and the ability to save favorite recipes, the application streamlines the recipe discovery process and provides users with a valuable tool for their culinary endeavors. The convenience, accessibility, and user-friendly nature of the app make it a novel and practical solution in the realm of recipe-based applications.
